

REVOLUTIONIZING THE SEAMING INDUSTRY

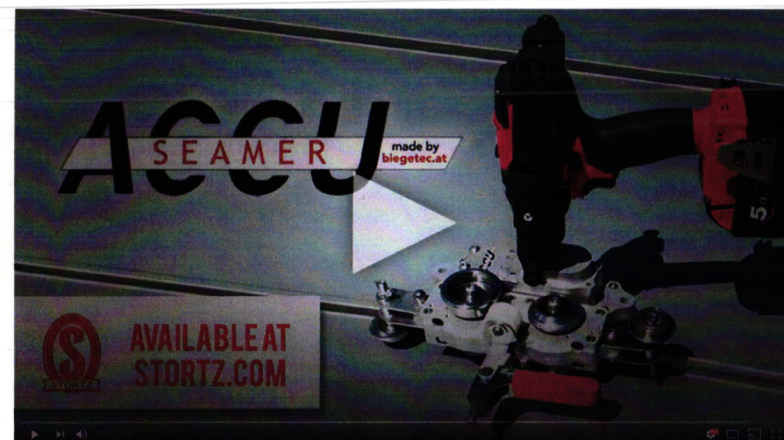

The AccuSeamer is a drill attachment for seaming 90° and 180° mechanical locking panels. Its lightweight design (8.5lbs) offers a convenient solution to turn your 18V drill into a cordless power seamer.

For 1" and 1.5" seam heights, the AccuSeamer is more affordable and lighter than a power seamer, while seaming at five times the speed. The AccuSeamer allows you to avoid the time-consuming nature of hand locking as well as lugging a heavy power seamer to the rooftop. It will seam up to 24ga painted steel, 26ga stainless, 20oz copper, .032 aluminum, .8mm zinc.

DETAILS & FEATURES

- 1/3 the cost, 1/4 the weight, 5x as fast
- For seaming of single and double standing seam on straight and round panels
- Seams up to 180 ft / min - a typical power seamer is ~35ft
- Seaming heights: 1" or 1 1/2"
- Simple adjusting from position 1 to 2 by rotating the seaming element
- Works with conventional (18v, 5 amp) cordless power drills -
